

Application Serial No. 10/796,886
Amendment Dated August 24, 2005
Reply to Office Action Dated May 24, 2005

Amendments to the Specification:

Please replace paragraph [0025] with the following amended paragraph:

[0025] Referring to Fig. 1, in one embodiment, drains 15 as well as plumbing fixtures, for example, one or more commodes 16, tubs 17, sinks 18, etc., in a building 20 are connected to respective running traps 29 of building drain piping 22. The building drain piping 22 also includes one or more soil stacks 19 [[in a building 20 and]] that discharge wastewater from various running traps 29 through a building drain piping 22. The building 20 can be used for residential, commercial, or industrial purposes. The building drain piping is to an intake or upstream end 23 of a building sewer service line 24, which is located below grade 25 and is often 6 inches (15 centimeters) or more in internal diameter for a single family dwelling. A discharge or downstream end 27 of the sewer service line 24 is connected to a sewer main 34. For purposes of this document, "downstream" refers to a location nearer to, or a direction extending toward, the sewer main 34, and "upstream" refers to a location nearer to, or a direction extending toward, the building 20.
